

LILO automation python BOT

1. Steps to Use the Automation LILO- Tracker (After Launching via .bat File)

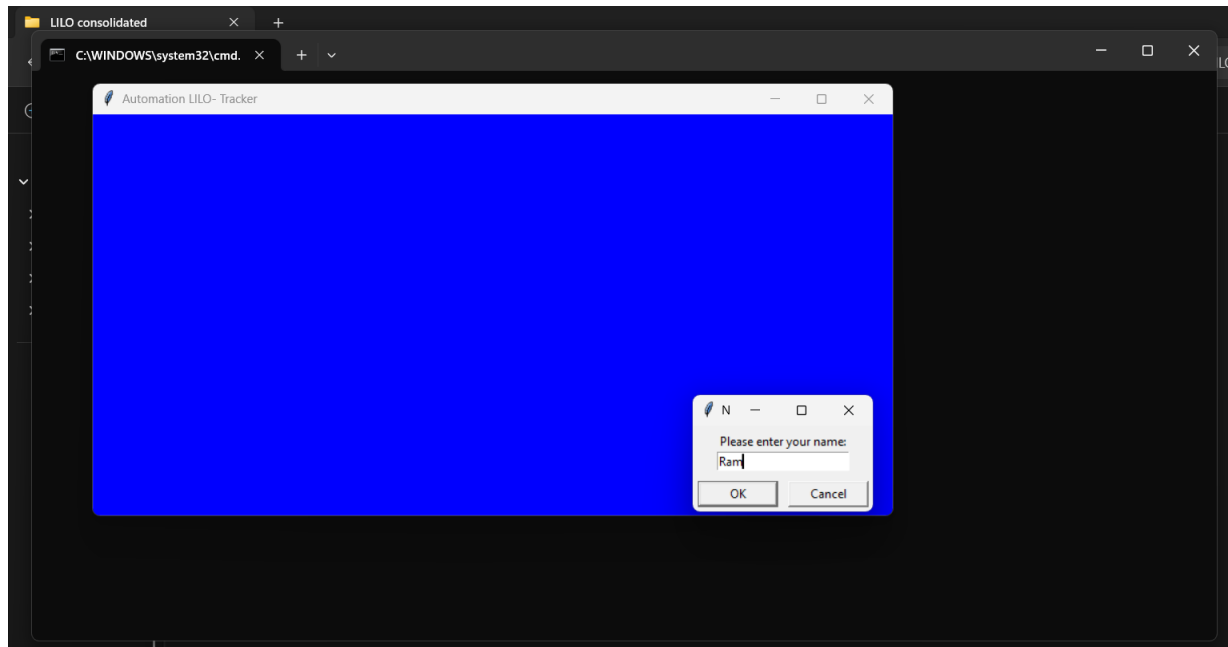

- **Launch the Application**

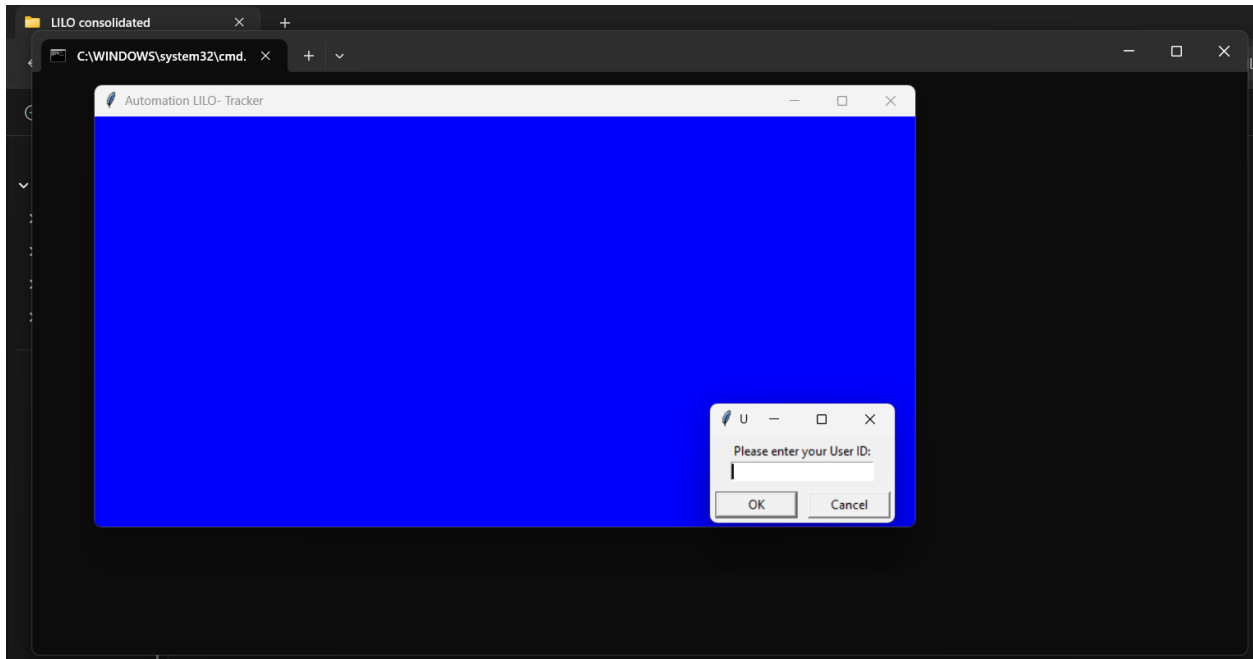

- Double-click the .bat file. This will open the Python-based tracker application.

2. Welcome Screen

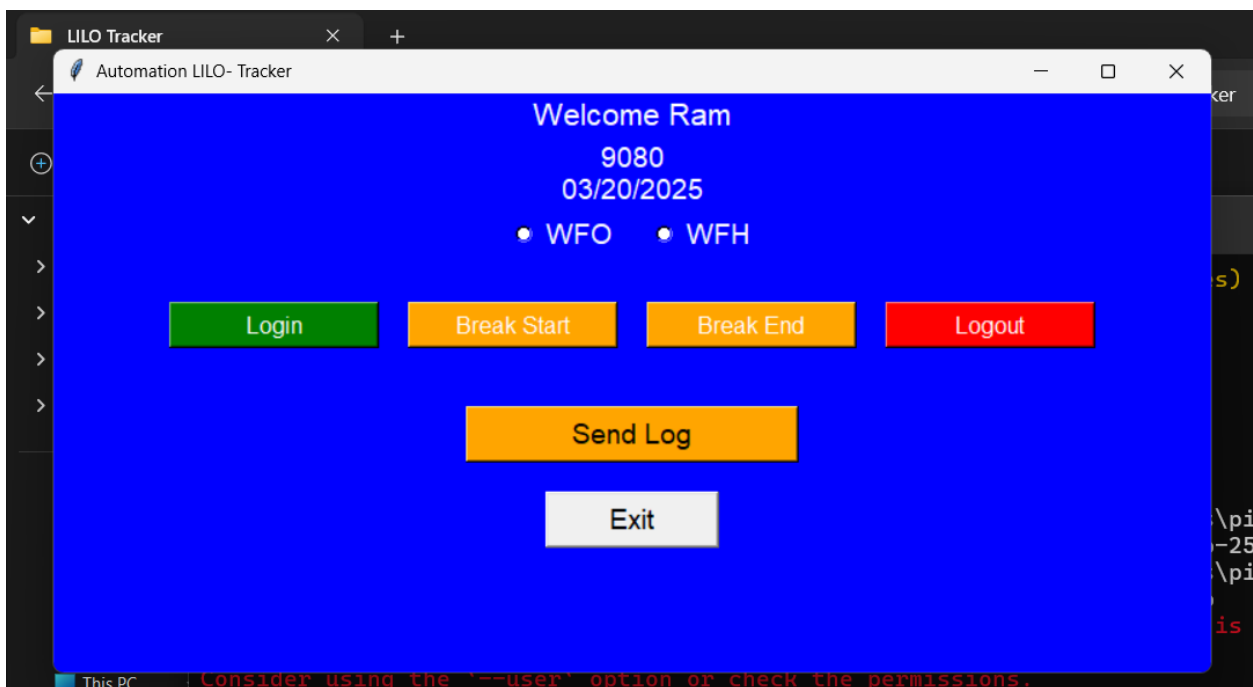

- A window appears, displaying your name and user ID along with the current date and time.
- Confirm that your details are correct.

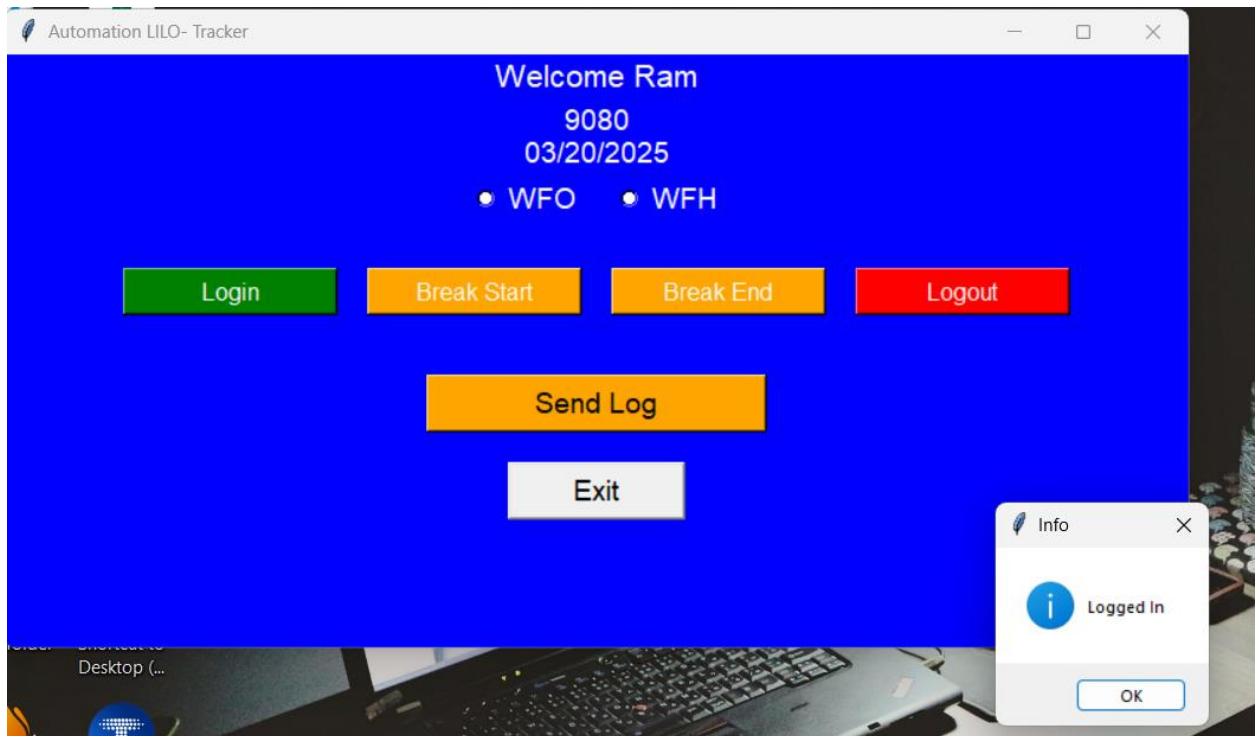

3. Select Work Mode

- Choose your work mode:
 - **WFO (Work From Office)**
 - **WFH (Work From Home)**
- Click the corresponding radio button to select your mode.

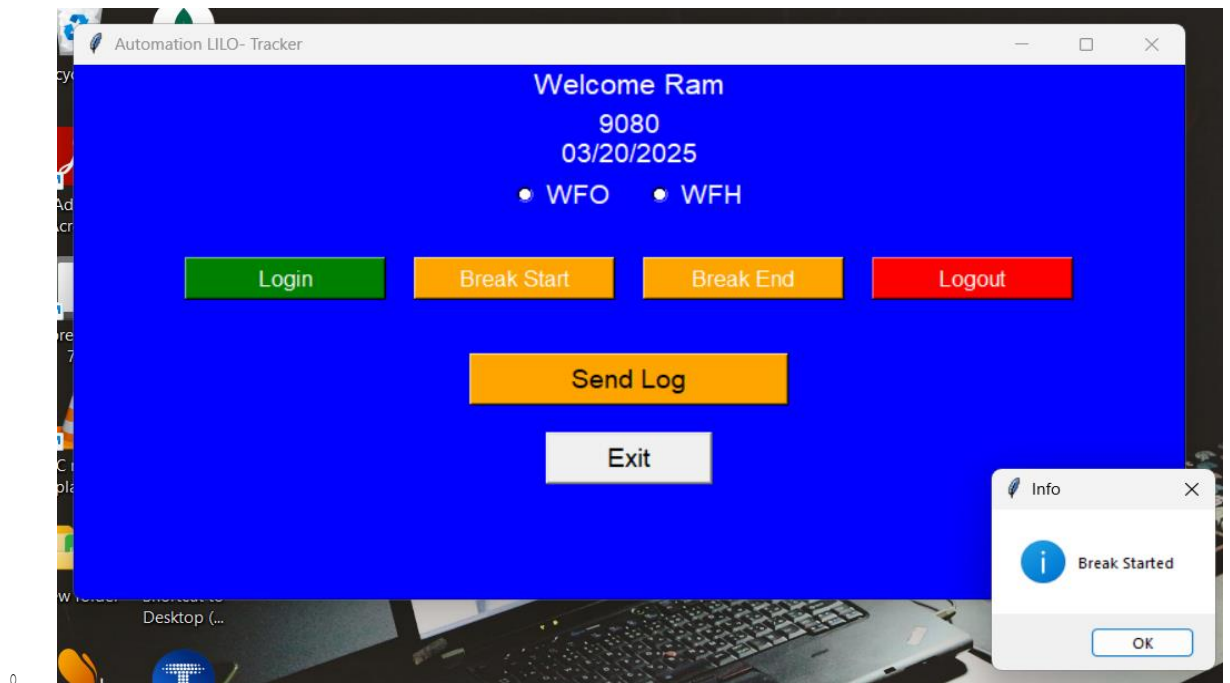

4. Login

- Click the **Login** button to mark your entry time.
- A confirmation message will appear saying, “Logged In.”

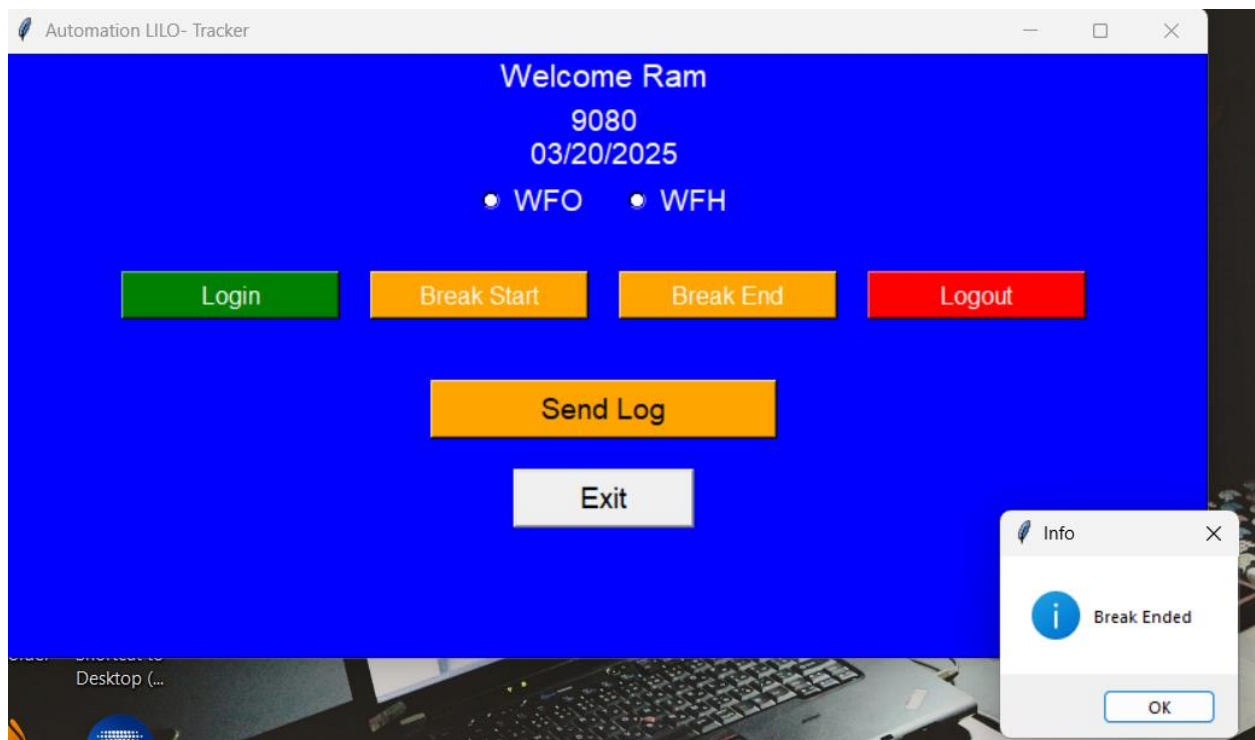

5. Taking Breaks

- To record a break:
 - Click the **Break Start** button when you start your break.
 - A message will confirm “Break Started.”

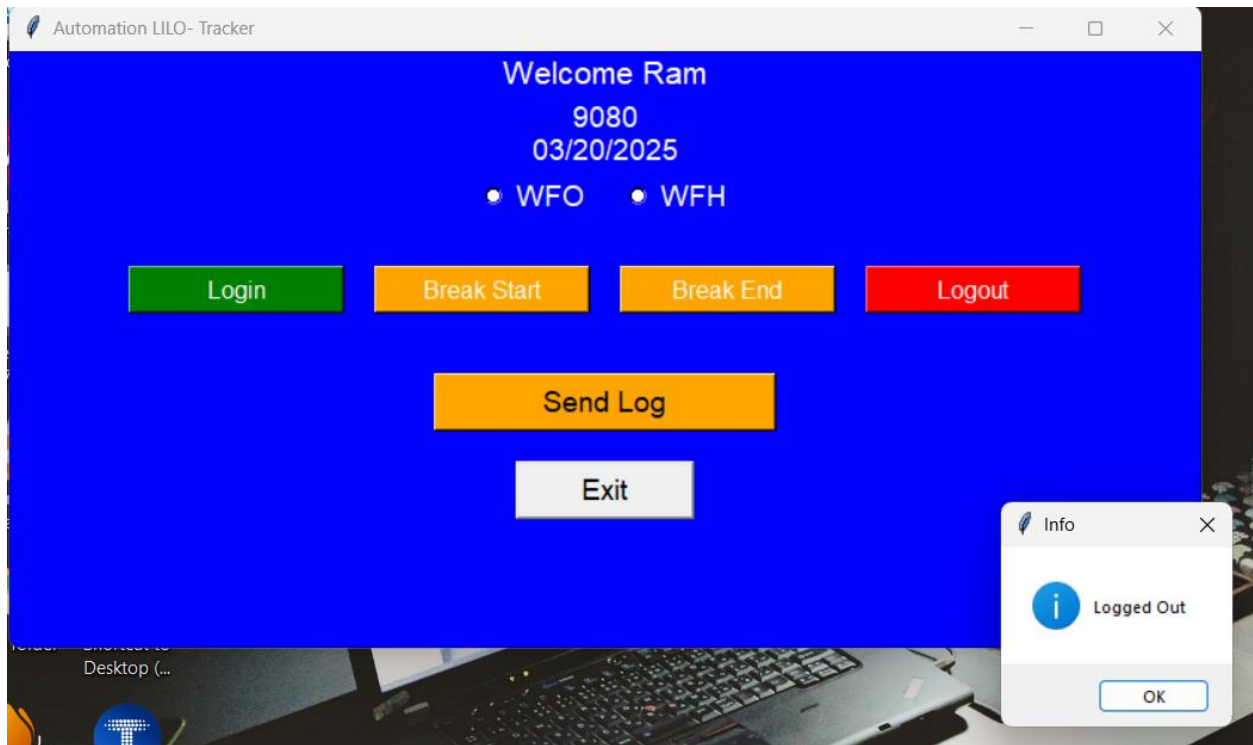

- 0 To end your break:
- 0 Click the **Break End** button after your break.
- 0 A message will confirm “Break Ended.”

6. Logout

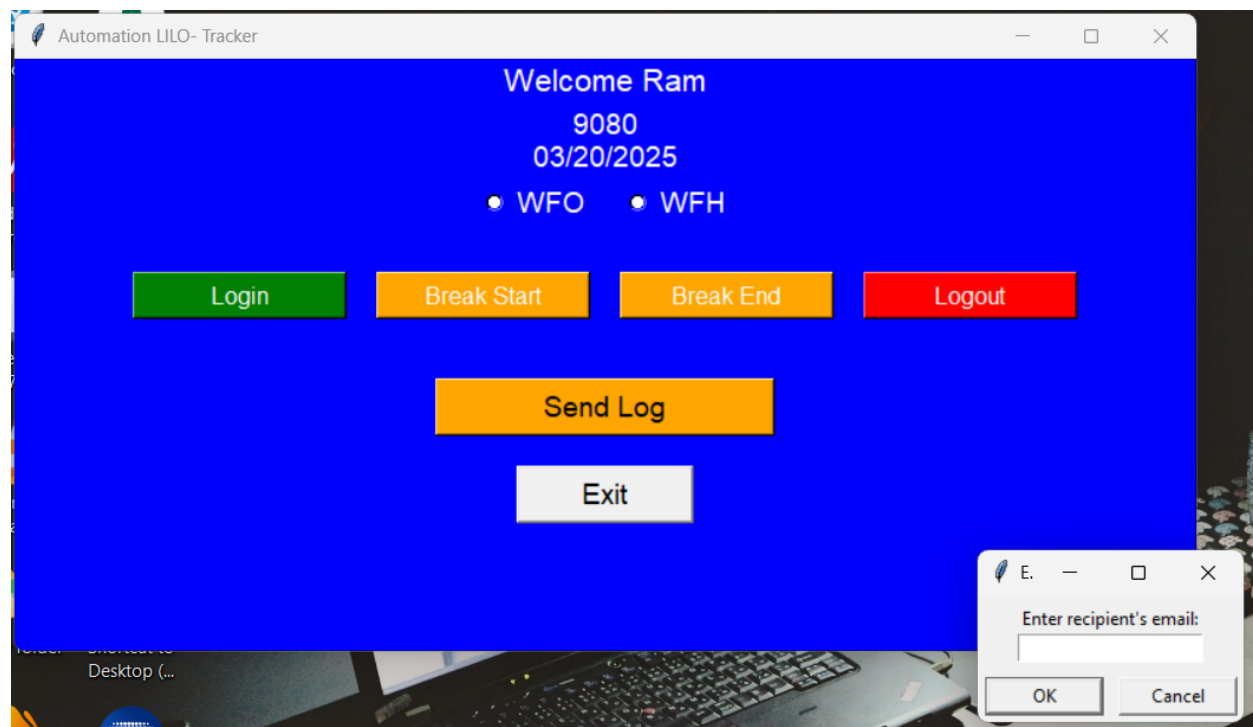

- When your work is done for the day, click the **Logout** button.

- The application will:
 - Record your logout time.
 - Calculate your **total working hours** (excluding break time).
 - Open a prompt asking for the recipient's **email address** to send the log.

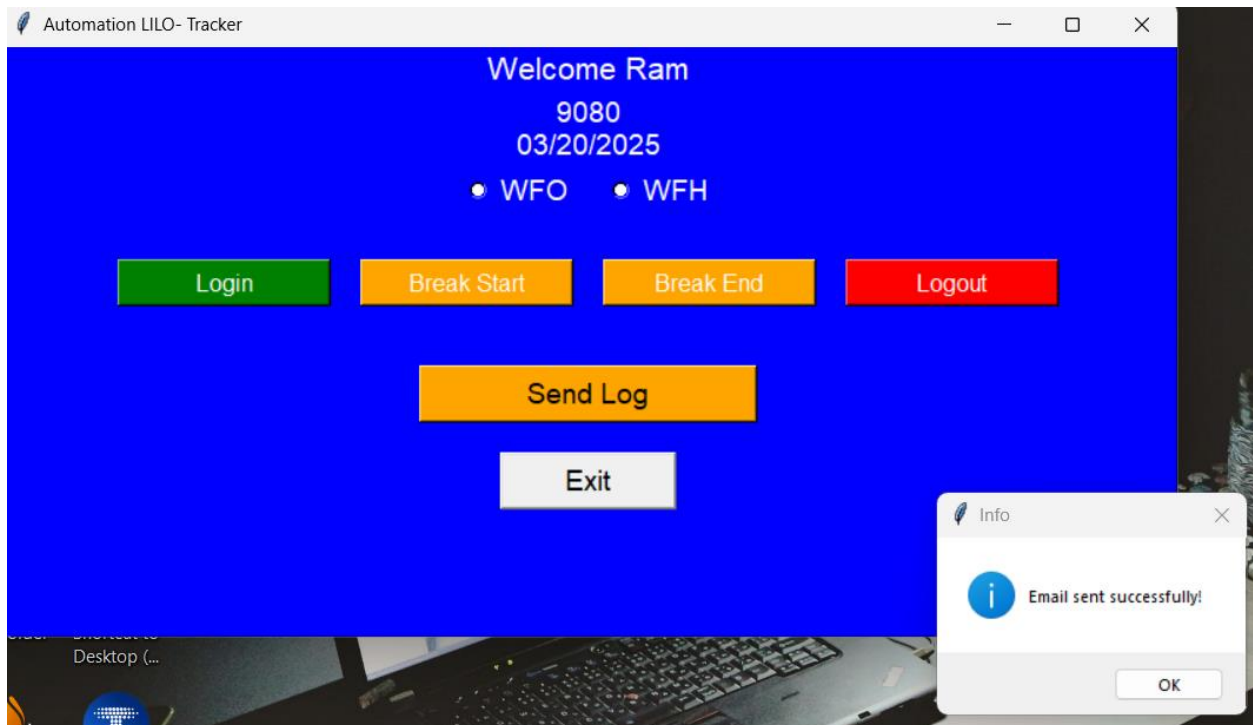

Enter Email and Send Log

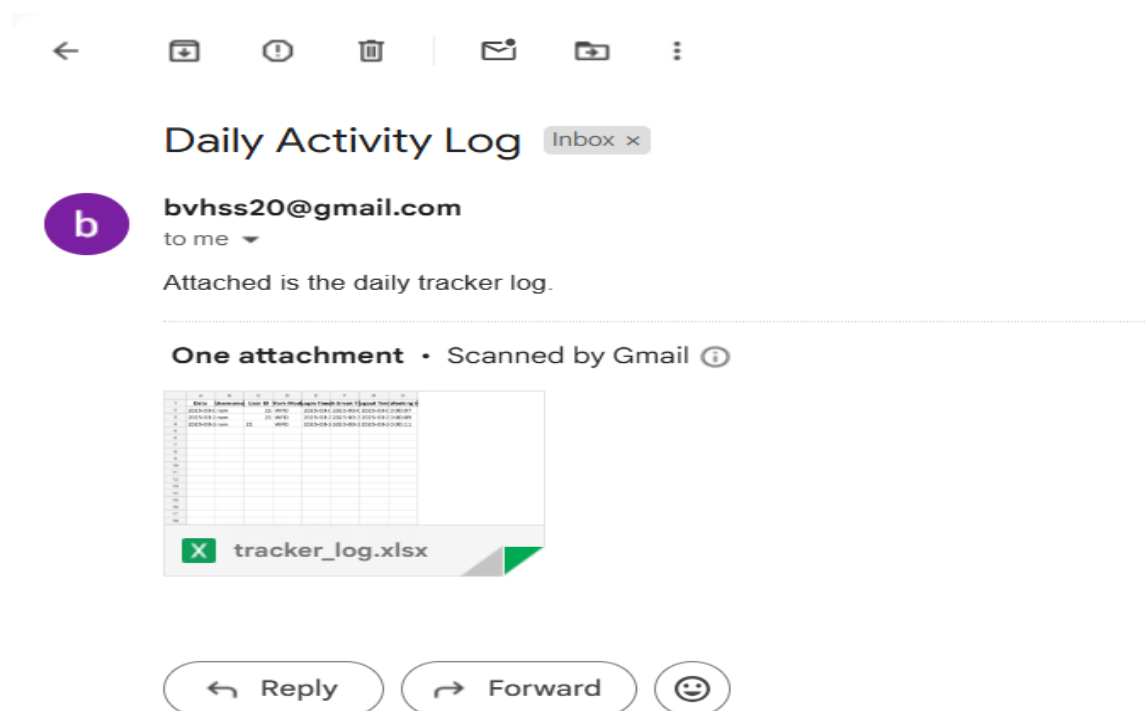

- Enter the recipient's email address in the prompt and press **OK**.
- The application will send an email with the tracker log file as an attachment.
- A message will confirm that the email has been successfully sent.

Example your email

7.

Exit the Application

- Close the application window manually, or click the **Exit** button if available.
